To Whom It May Concern:

PPG Industries Inc., (PPG), is submitting this information pursuant to Section 8(e) of TSCA.

PPG is submitting draft summary information concerning a toxicology study with respect to 2-Ethylhexyl Chloroformate.

The final report will be provided to the EPA once received by PPG.

The acute inhalation toxicity of 2-Ethylhexyl Chloroformate was evaluated in a single four-hour exposure study in rats. The test chemical was administered as a vapor atmosphere to five groups of five male and five female albino rats each via whole-body exposure.

Based on the results of this study the LC50 of 2-Ethylhexyl Chloroformate was determined to be 48ppm.

The substance 2-Ethylhexyl Chloroformate is used in the chemical synthesis industry.

PPG provides our customers with labels and MSDS, which specify procedures for proper handling and disposal of this chemical substance including the use of personal protective equipment.

Please telephone me at [412/492-5525] if you have any questions.
